

I'm a web developer and graphic designer with a passion for learning new things. I tend to lean more towards the front-end, but I can do some back-end work too.

On my free time, I like hiking, volleyball, and playing board games. I also make little video games and dabble in hardware projects (Arduino, etc).

⚡ Development Skills

HTML, Pug (Jade), Mustache (and similar template languages)
CSS, Sass (SCSS), BEM methodology
JavaScript, TypeScript, Node.js
PHP, WordPress
MySQL, SQLite
Lua, some Python
GLSL (for Three.js/WebGL projects)
Git

I've worked with Vue and React before.
I have experience with unit testing.
I'm familiar with modern front-end build systems with Webpack, Babel, Gulp, PostCSS, etc.

🎓 School

Visual Communications AA
Planning to graduate early 2019
Whatcom Community College, Bellingham WA

🖱 Software Skills

I'm well versed in the Adobe suite, including Illustrator, Photoshop, Premiere and Experience Design. I also can use Blender 3D.

📁 Professional Affiliations

Future Business Leaders of America (FBLA)
Member from 2015 - 2018
participated in various competitive events related to business and technology.

👤 Volunteer Work

Alderwood Elementary Tech Literacy Club
2016 school year
Guided students in working with digital illustration, visual programming with Scratch, putting together littleBits circuits, and various other things.

Slavic Gospel Church New Year's Committee
2015 - Present
Designed and programmed various game shows for an annual New Year's celebration in my church, including ones that use text messaging and homemade WiFi-connected buttons.

Slavic Gospel Church Information Committee Leader
February 2018 - Present
I am one of the people in charge of the SGC Information Committee, which handles most of the announcements, posters, newsletters, and the official church website. I mostly work on the website.
